

Fenix 
Dressage Phaeton

a lightweight, elegant carriage
with bespoke designs for single horse/pony and horse/pony pairs

Fenix Dressage Phaeton

Ready for the arena,
no extras necessary!

This eye-catching vehicle, based on a traditional Spider Phaeton, is individually made to ensure a perfect fit for the horse and driver. It has been specifically developed for the dressage and cones phases of modern competitive driving for single horses and ponies. Horse and pony pair carriages of similar design are also available.

Built on a similar forecarriage to the Flyer, the Phaeton gives the driver the same 'feel' and turning capacity in the cones as they are accustomed to on the marathon.

Tailor made for the discerning driver who wishes to reproduce the elegance of yesteryear while driving a performance carriage.

Guarantee

Every FENIX Carriage is covered by our three year warranty and all work is carried out in our own workshops by the finest craftsmen in the industry.

SEATS

- STANDARD - comfortable driver sport seat with side support giving enhanced driving position. Adjustable to central position if required.

Or, as pictured...

- TRADITIONAL - Spider Phaeton Seat - luxury deep buttoned and quilted leather with driver cushion adjustable to central position if required.
- Single rear groom seat with padded seat back.

BODY

- Lightweight high tensile steel structure with quality phenolic coated birch plywood panels.

COLOUR

- After shot blasting and anti-corrosive primer, the carriage is powder coated in your choice of colours. This provides a tough quality finish which is easy to maintain.
- A further option is to have the carriage coach painted and lined.

DASH

- Curved leather dash and elegant curved leather mudguards.

SUSPENSION

- Hand forged traditionally made fully elliptical multi-leaf springs are fitted all round, these ensure a comfortable and stable ride.

WHEELS

- Steel wheels, with oval spokes, incorporating taper roller bearings are fitted as standard. Wooden wheels provide a more traditional option.

SHAFTS

- Tubular steel shafts are individually shaped for each horse or pony to ensure a perfect fit, plastic coated and finished with the finest brass or white metal furniture.

BRAKES

- A modern disc braking system using advanced aluminium racing callipers is fitted as standard.

FORECARRIAGE

- Ballbearing ring turntable on both models, accurately machined by our own engineers to eliminate play.
- Driver foot-operated hydraulic turntable brake (optional).
- Delayed steering - incorporating taper roller bearings - geometrically designed giving excellent ground following (optional).

WEIGHT

- From 195kg depending on exact model and options.

Fenix
**Dressage
Phaeton**

Traditional Spider Phaeton Seat

Standard
Traditional Style Rail Seat

Also available is an alternative style for the Dressage Phaeton with a fuller wood panelled body and a choice of wooden or metal wheels.
