

Fenix 
Flyer 2010

the future is here!

Fenix Flyer 2010

The future of single horse driving with an unrivalled specification

Fenix Carriages

Stylish carriages that ride superbly - incorporating state of the art design and sound engineering.

Tailored to suit you

Fenix carriages are designed and individually built by a small team of dedicated craftsmen renown for their attention to detail. Our own experience gained in competitive events has given us the ability to manufacture bespoke carriages of a quality unrivalled by others.

Stable and manoeuvrable

Stability is closely linked to weight distribution and springing. We manufacture our own springs, so they can be custom made to suit the size and weight of the driver and backstepper. The sliding seat provides the final adjustment for driver comfort and security.

Guarantee

Each carriage comes with a three year warranty with excellent service and after-sales support.

FORECARRIAGE

- Option of two styles of forecarriage and front springing.
- Model 2010L - Lightweight forecarriage with fully elliptical springs.
- Model 2010D - Dennett sprung forecarriage with front wheel fenders.
- Ballbearing ring turntable on both models, accurately machined by our own engineers to eliminate play.
- Driver foot-operated hydraulic turntable brake.
- Delayed steering - incorporating taper roller bearings - geometrically designed eliminating tail sway giving excellent ground following.

SHAFTS

- Wide shaft fitting ensuring comfort and easy, unrestricted turning for horse.
- Shafts linked for greater stability and ease of 'putting to' or independent shaft can be fitted if preferred.
- Set back swingletree for close coupling.

WHEELS

- Lightweight ERW steel wheels fitted with taper roller bearings containing oil seals.
- Polished aluminium caps fitted as standard.
- Rear disc brakes.

SUSPENSION

- Multi-leaf springs, bespoke made on the premises to accommodate the weight of each driver and backstepper.
- Increased stability and outstanding ground holding.

WEIGHT

- From 160 - 186kg depending on options.

SEATS

- Sporting, comfortable driver sport seat with side support giving enhanced driving position.
- Sliding driver's seat ensuring comfort and finite leg position.
- Incorporates backsteppers information pocket as standard.

3 PHASE FITTINGS

- Removable rear seat, lamp brackets and telescopic axle option for 3 phase competition.

BUILT WITH THE BACKSTEPPER IN MIND

- Multi adjustable grab handles to suit all backsteppers.
- Padded area as standard.
- Increased back step area with aluminium chequerplate or non-slip aluminium raised perforated sheet.
- Removeable rear step extension.

COLOUR

- Colour of your choice.

CONSTRUCTION

- Lightweight, but strong, frame construction with the option of stainless steel surround fenders and handles.

Model 2010D

Fenix 
Flyer 2010

Model 2010L

Other models available...

Extra Lightweight Pony Flyer

- Three sizes available from shetland to large pony.
- Available as a marathon carriage or a 3 phase option.
- Similar main component specification as Flyer 2010.

Country Flyer

- For that more traditional look.
- Available for all sizes of pony and horse.
